Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2674

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 3-30, 38, 39, 41-44, 46-49, 51-62, 64 and 65 are rejected under 35 U.S.C. 102(e) as being anticipated by Fan et al. (US Patent No. 5,815,126).

Fan discloses a wearable computer (710A, Fig. 37) for use in a process environment having a process control system (780A) including a plurality of process control devices disposed within the process and external to the wearable computer, the wearable computer comprising: a processing unit (712); a computer readable memory (714); a heads up display(Figs. 48-50); an input device (718) that provides an input signal to the processing unit; and a software routine stored in the computer readable memory and run on the processing unit that processes the input signal and provides process information generated by one or more of the plurality of process

Art Unit: 2674

control devices during operation of the process to the process control system via the heads up display. As shown in Figs. 36-45, Fan discloses many examples for showing the wearable computer communicating through video and audio with a central computer. The wearable computer comprises different sensors such as for sensing temperature, pressure, carbon monoxide, neutral gas etc. The central computer can provide an instruction to user of the wearable computer based on the information detected by the sensors.

3. Applicant's arguments filed 12/12/2002 have been fully considered but they are not persuasive.

Applicant argues that wearable computer of Fan does not allow a user to provide process information generated by one or more of the process control device external to the wearable computer. This argument is not persuasive. As shown in Fig. 43, Fan discloses that an astronaut can access a local storage 714 which contains map, schematics and instructions for use by the astronaut. Fan also discloses a communication module 720G provides an audio, video and data link between the astronaut and command ship 770G and ground station command 780G (see col. 20, lines 18-65). It is believed that the prior art reference to Fan still read on the claimed structures.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 2674

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xiao Wu whose telephone number is (703) 305-4721.
